

Project 1: Build a Todo App with React & Tailwind

Due Date: 20th July, 2023 23:59:59

1. Using React and Tailwind CSS, build out this **Todo App** and get it looking as close to this design as possible.
2. Your users should be able to:
 1. View the optimal layout for the app depending on their device's screen size
 2. See hover states for all interactive elements on the page
 3. Add new todos to the list
 4. Mark todos as complete
 5. Delete todos from the list
 6. Filter by all/active/complete todos
 7. Clear all completed todos
 8. Toggle light and dark mode
 9. Drag and drop to reorder items on the list

In case you need it, here is the link to the original source of this project [Freontend Mentor: Todo App](#)
